

## GEON® Polymax P3816-1

GEON Performance Solutions - Thermoplastic Elastomer

Thursday, February 29, 2024

## **General Information**

**Product Description:** 

Color: Natural

Features: soft Touch Rubbery Feel, Stretchable, Excellent Grip, Good Processability and Colorability.

Applications: Housewares, Consumers, Toys and Grips. Overmolding onto PP substrates.

## **Typical Properties**

| Physical                    | English  | SI Metric                | Test Method               |
|-----------------------------|----------|--------------------------|---------------------------|
| Hardness (Shore A, 10 sec)  | 42       | 42                       | ASTM D2240                |
| Specific Gravity            | 0.95 g/d | cm <sup>3</sup> 0.95 g/c | cm <sup>3</sup> ASTM D792 |
|                             |          |                          |                           |
| Mechanical                  | English  | SI Metric                | Test Method               |
| Tensile Strength            | 554.6 ps | i 3.82 M                 | Pa ASTM D412              |
| Tensile Elongation at Break | 665 %    | 665 %                    | ASTM D412                 |
| Tensile Stress @100% Strain | 207 ps   | i 1.43 M                 | Pa ASTM D412              |
| Tensile Stress @300% Strain | 389 ps   | i 2.68 M                 | Pa ASTM D412              |
| Apparent Viscosity          |          |                          |                           |
| 392°F (200°C), 11170 1/s    | 11.7 Pa  | a.s 11.7 P               | a.s ASTM D3835            |
| 392°F (200°C), 1340.5 1/s   | 64.1 Pa  | a.s 64.1 P               | a.s ASTM D3835            |
|                             |          |                          |                           |

## PROCESSING PARAMETERS

| Injection Molding           | English       | SI Metric       |  |
|-----------------------------|---------------|-----------------|--|
| Zone 1 Temperature (Feed)   | 320-350 °F    | 160-180 °C      |  |
| Zone 2 Temperature (Middle) | 350-383 °F    | 180-195 °C      |  |
| Zone 3 Temperature (Front)  | 356-410 °F    | 180-210 °C      |  |
| Zone 4 Temperature (Nozzle) | 356-410 °F    | 180-210 °C      |  |
| Mold Temperature            | 60 to 80 °F   | 16 to 27 °C     |  |
| Back Pressure               | 50 to 150 psi | 0.34 to 1.0 Mpa |  |
| Screw Speed                 | 25 to 75 rpm  | 25 to 75 rpm    |  |
|                             |               |                 |  |
| Suggested Maximum Regrind   | 20 %          | 20 %            |  |

Drying is not typically required. Drying Temperature is 175°F (80°C) for 2 hours if there is surface moisture. Purge thoroughly before and after use of this product with a low melt flow polyethylene (PE) or polypropylene (PP). Regrind levels up to 20% can be used with Polymax TPE with minimum property loss.
